Schulich School of Engineering – Engineering Design Fair 2025
Judging Rubric

Booth #: _____ Judge: _____

	Biomedical		Energy		Multidisciplinary & Aerospace
	Chemical/Petroleum		Entrepreneurial		Software
	Civil		Geomatics		
	Electrical		Mechanical		

	Strongly Disagree	*Disagree*	*Neutral*	*Agree*	*Strongly Agree*

1. Design Quality

The design project addresses practical issues	1	2	3	4	5
Scientific knowledge and industrial practices are properly applied to develop the design solution	1	2	3	4	5
The design solution is innovative, practical, and feasible	1	2	3	4	5
Evidence (e.g., testing and simulation) is provided to objectively validate the design solution	1	2	3	4	5

Sub-total: /20

2. Communication

The team effectively communicates the needs of the project	1	2	3	4	5
The team clearly describes the design solution	1	2	3	4	5
The team highlights the originality and effectiveness of the design	1	2	3	4	5
The poster is effective and engaging to overview the design project	1	2	3	4	5

Sub-total: /20

OVERALL TOTAL: /40

Schulich School of Engineering – Engineering Design Fair 2025
Judging Rubric

3. Entrepreneurial Considerations – for ENT projects ONLY

Has the team validated their idea with the market (customer survey analysis, market data sources, identified pain points etc.)?	1	2	3	4	5
Has the team identified the competitors in the space and determined the advantages of their solution?	1	2	3	4	5
Has the team evaluated the market potential and presented a compelling business case, with clearly identified costs and revenue streams? Has the team provided a clear and reasonable justification for their chosen sales model?	1	2	3	4	5
Does the team have a well-defined go to market plan with a realistic timeline? Are regulatory considerations identified and addressed? What resources do they require?	1	2	3	4	5

Sub-total: /20

4. Accreditation Questions

The team collected and interpreted the project requirements	1	2	3	4	5
The team analyzed the trade-offs between alternative design approaches and selected the best one	1	2	3	4	5
The team tested the design solution to determine if it met its specified needs	1	2	3	4	5
